

## Planned Steag power plant in logport VI

# Approval process makes decides on biomass

**Duisburg, 11 September 2018** - With regard to the planned construction of a biomass power plant in logport VI in Duisburg-Walsum, duisport would like to note the following.

At the beginning of this year, the Port of Duisburg was approached by Steag regarding the construction of a biomass power plant on a maximum 3-hectare logport VI parcel located directly on the Rhine.

Given the positive and long-standing business relationships between the two companies, duisport immediately investigated whether such a power plant can be built on the land parcel, which covers an area of 40 hectares.

Since the use of this relatively small area would not have a negative impact on the overall use of logport VI for value-adding logistics, duisport subsequently offered Steag the area highlighted in the attached site plan. The incoming transport of biomass by ship also played a role in duisport's proposal to Steag.

The utilization of biomass in the planned power plant forms a part of the approval process between Steag and the approval authorities in charge.

**Duisburger Hafen AG** owns and manages the Port of Duisburg, the world's largest inland port. For this port and logistics location, the **duisport Group** offers full service packages in the area of infra- and superstructure, including relocation management. In addition, the subsidiaries also provide logistics services, such as the development and optimization of transport and logistics chains, rail freight services, building management and packaging logistics.
