Freight Forwarding and
Lead Logistics Provider (LLP)

WITH RESILIENCE AND FLEXIBILITY

YOUR CHALLENGES

Fragmented supply chain

Unclear cost structure

Administrative overhead and resource allocation

Global compliance risks

One-Stop-Shop

We handle the entire supply chain. Managing delivery schedules, arranging transportation, packaging, and delivery to the construction site—it's all part of our daily routine.

Cost transparency

We are a lead logistics provider offering 100% cost transparency, starting right from the analysis phase of project planning.

Resource efficiency

We assume the risk associated with fluctuating workload and provide all necessary functionalities on a performance-based basis.

Compliance

We offer local expertise and global reach. Not only in packaging, but also in shipping regulations, document management, and customs regulations.

OUR SOLUTIONS

AS UNIQUE AS YOUR FINGERPRINT

Packaging consulting

Packaging engineers provide consulting, plan, and handle complex requirements

Global standards

in accordance with ISPM 15 and additional requirements, 100% FSC-certified

Semi-automated manufacturing

Digital, fast, and transparent processes

Batch tracking

Traceability of the wood used through the use of IT systems

Tested.

Certified.

Audited.

Packaging systems

Reusable and tailored to the material, shipping method, and requirements

Manufacturing versatility

Plywood | Screen printing plates | OSB | Multiplex | Glulam | Solid wood | Composite packaging

Focus on sustainability

Solar energy for manufacturing

- Recycling of wood scraps
- Packaging systems designed to last for decades (clip box)

Internationally at more than 10 locations

PROTECTING ASSETS – THROUGHOUT THE SUPPLY CHAIN

High-quality packaging

Industrial goods packaging in accordance with the world's leading HPE packaging standard or according to individual specifications

We're there when we're needed

Deployment of mobile packaging teams, either on-site at the production facility or at our consolidation centers, as needed

Preserved in optimal condition

Preservation using all standard methods and for the necessary duration of storage and transport

No screw is too small, no machine too big

Whether it's a cardboard box, a sled, the floor, a shed, a crate, or a steel structure

Experts in preserving value

- Trained, qualified, and audited staff
- Our own intensive training program for packaging professionals
- Mobile and flexible

Everything under control

- Transparent, digital process
- Photo documentation of all relevant processes in the customer portal (24/7 access)

Safe under all circumstances

- Load securing
- Air freight
- Container congestion
- Hazardous materials
- Heavy-lift cargo handling

With factory logistic and value added services

THE ADDED VALUE FOR THE CUSTOMER'S BUSINESS

Warehouse logistics

- Receiving department
- Completeness check in the goods receiving process
- Management of the warehouse, including all booking procedures
- Simple material processing, such as sawing or deburring

Internal transport

- Supply and waste management for production
- Material handling in the factory

Shipping logistics

- Handling of commercial shipping processes
- Operational shipping processing
- Load securing and much more

Locations

> 5 Mio.

We take responsibility for your goods – flexibly and efficiently

THE RIGHT WAY

is the one that ensures your goods are delivered safely and efficiently from door to door.

Freight forwarding & Lead Logistics Provider

Significant relief, high transparency, and maximum flexibility

- All modes of transport (trucks, trains, ships, airplanes)
- Complete commercial and administrative handling of shipping
- Access to approximately 100 trucks from a sister company, if needed
- Smoothing out fluctuations in demand
- Reporting
- Customs: Certificates of origin, customs clearance, customs processing, preferential documents
- Hazardous materials handling for all modes of transport

Your benefits

- Reduced workload through minimization of interfaces
- Maximum compliance and security in global shipping
- The perfect balance of price, transit time, and service
- Transparency of costs at all times

Freight forwarding OR Lead Logistics Provider?

This can also be done independently.

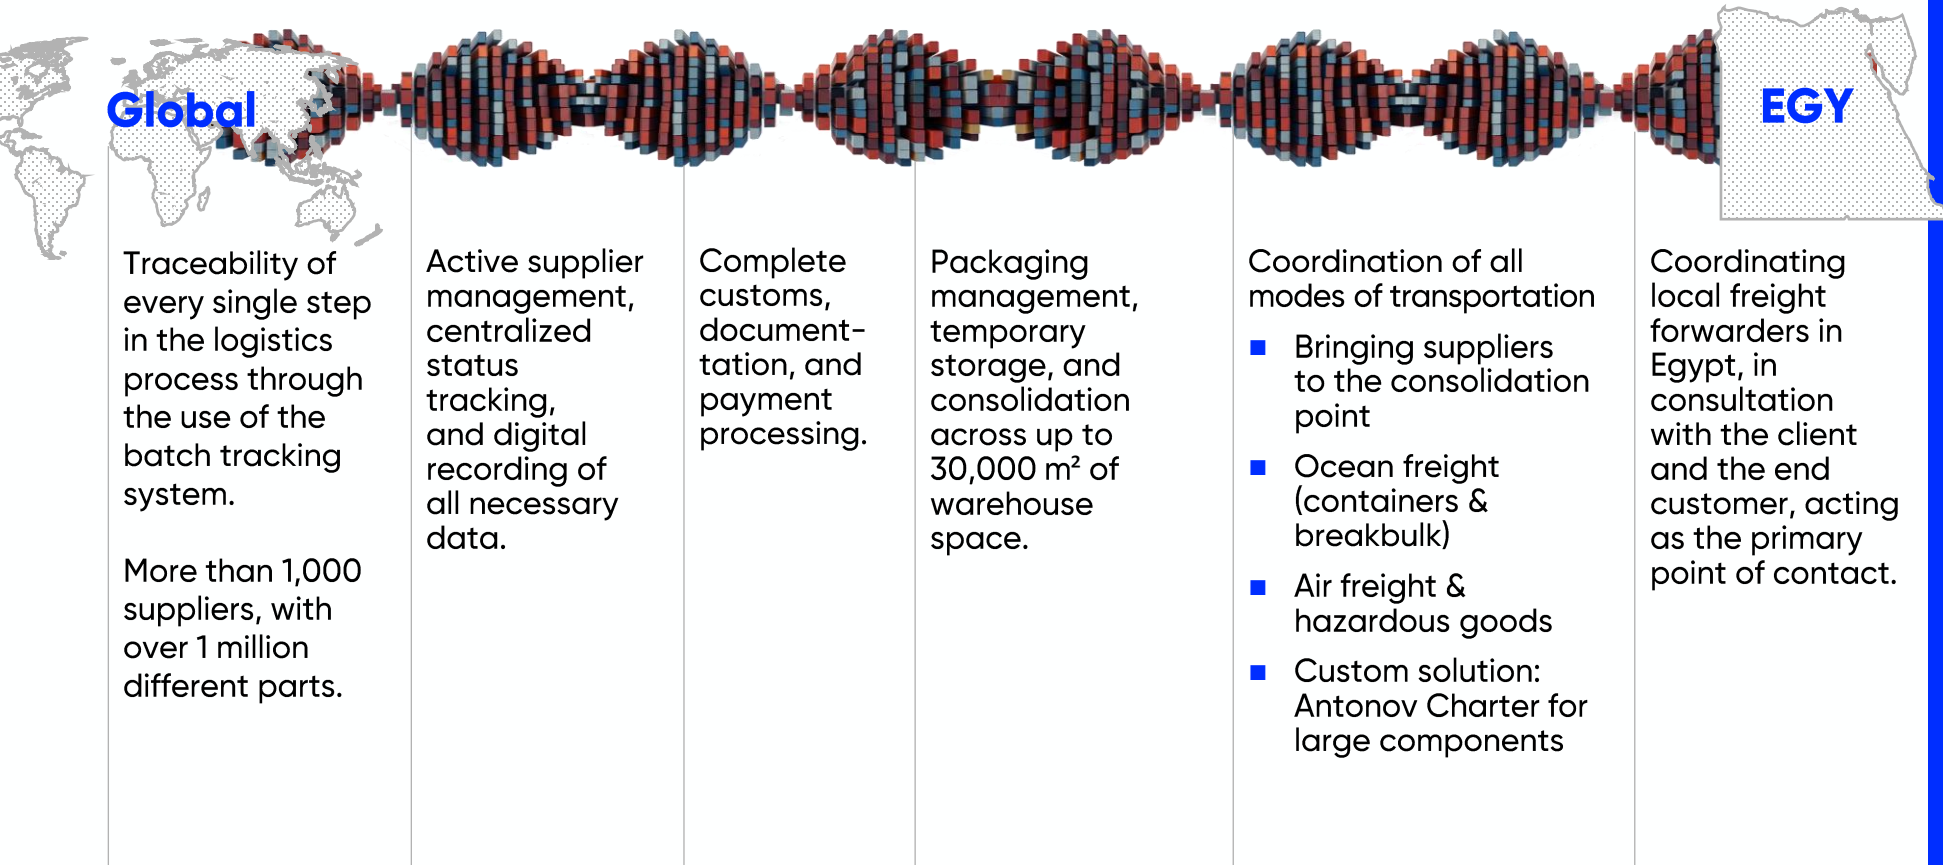

END-TO-END-PROJECT LOGISTICS ON SCHEDULE

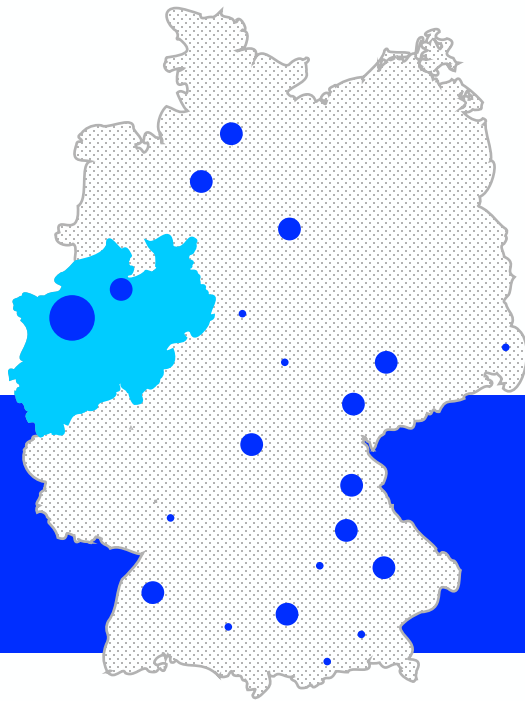

Our case study:
Turnkey project management for three
fertilizer plants in Egypt

Solution

Benefits

- Time and cost optimization through structured processes and tenders
- No construction delays
- High on-time delivery rate
- Significant reduction in the workload for the client organization
- Maximum transparency and traceability throughout the entire supply chain
- Reducing project risks in customs, transportation, and documentation

A STRONG LEGACY WITH SUCCESS GENES

More than 50 years of experience in packaging logistics

digitalization and
innovation at duisport

SMART PACKAGING

in the double helix of structured data

duisport's digital strategy integrates advanced digital solutions into port and logistics processes

From artificial intelligence (AI) to real-time data monitoring and augmented reality (AR).

Architecture & expertise	Digitization of business processes	Data & analysis	Digital business models
--------------------------	------------------------------------	-----------------	-------------------------

Exemplary projects

- **startport:** The innovation platform for logistics solutions connects startups with logistics companies.
- **RPIS:** RiverPorts Planning and an information system for the digitization of inland waterway transport.
- **TrailerPort:** The BMVI-funded project is developing innovative solutions for the efficient integration of trailers into inland port operations.

duisport digital

dis delivers clear benefits in terms of process efficiency and sustainability

Digital solutions—ranging from app-based material inspection and 3D design planning to semi-automated production—help minimize waste and reduce costs, among other benefits.

Exemplary actions

Digital portals

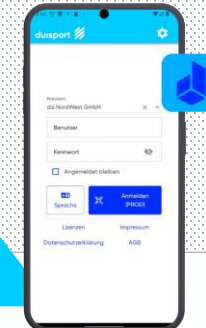

Customer portal with real-time information and supplier portal for more efficient communication and secure documentation.

Apps

In-house developments that support internal processes. For more efficient and faster access to items such as photos, etc.

WMS

Use of the WMS by a sister company at three locations. Hand in hand.

dis digital

RESPONSIBILITY AND DIVERSITY

Sustainability as a driver of growth and competitiveness

Environmental

A catalyst and pioneer of the green transition.

Example shore power:

69 shore power charging points throughout the port area help reduce local noise and pollutant emissions.

Social

Well-trained and diverse teams drive innovation and ensure our future viability.

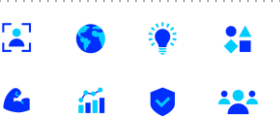

Example Charta der Vielfalt:

A commitment to recognizing, valuing, and incorporating diversity into the workplace.

Governance

Value-based governance for sustainable decisions and long-term trust.

Example culture and values development:

Definition of 8 core values as part of the group-wide culture and strategy initiative.

Our industrial logistics and packaging solutions make a significant contribution to environmental sustainability, from procurement and production through reuse to disposal.

Exemplary actions

Use of solar power

Green electricity for 90% of locations (by 2025)

100% certified wood (PEFC)

Almost exclusively electric forklifts in the packaging sector

Digital solutions to improve efficiency and reduce waste

Reuse and cascading use

- Wooden pallets and transport packaging as carbon sinks
- Packaging systems can be reused indefinitely when used properly
