

DNA WITH DIVERSITY

DUISPORT LOGISTICS
& PORT SERVICES

SALES DECK
JULY 2026

THE WORLD'S LARGEST INLAND PORT

Diversity is in our DNA. That's why we are one of the most important logistics hubs in Europe.

20,000
ships
processed

25,000
trains
processed

**100 million
tonnes**
of goods
handled

4 million
TEUs
handled

21
docks

10
container
terminals

200 km
Of pro-
prietary
tracks

~300
transport and
logistics
companies

52,000 workplaces
1,400 employees

130 crane systems
1,600 hectares of area

EUROPE'S TRIMODAL LOGISTICS NERVE CENTRE

Optimally and
internationally connected

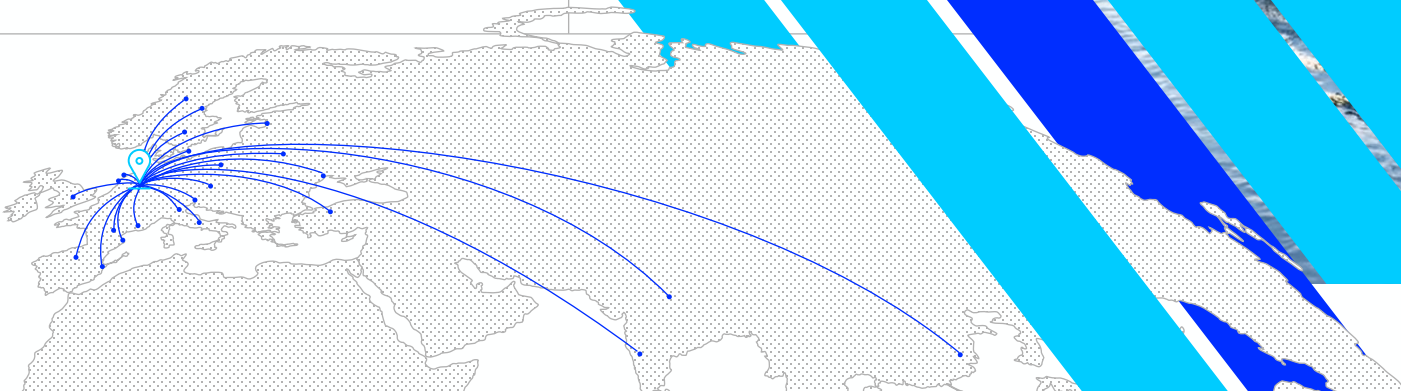

International
terminal participations

400
intermodal
connections to

100
destinations

**Global
locations**

in Belgium, the
Netherlands, Poland,
Turkey, India
and China

THE DIVERSITY OF OUR PORTFOLIO

This is what drives the efficacy
of our entire port organism
– from end to end

Infrastructure

Real estate
& floor space
management

Transport

Storage
& logistics

Industrial
logistics

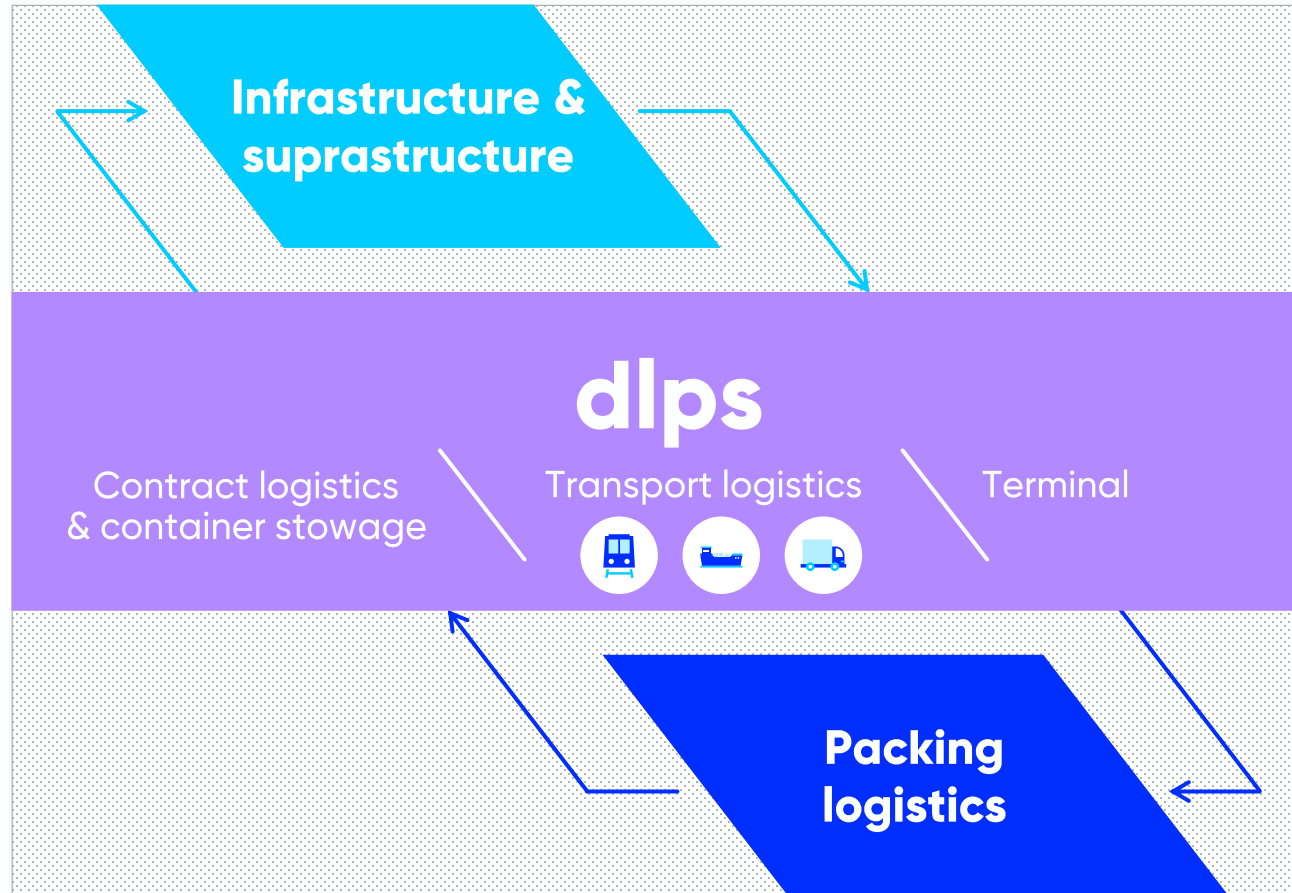

Robust strategies and flexible
LOGISTICS SOLUTIONS
for resilient supply chains

We link up technical expertise with international opportunities.

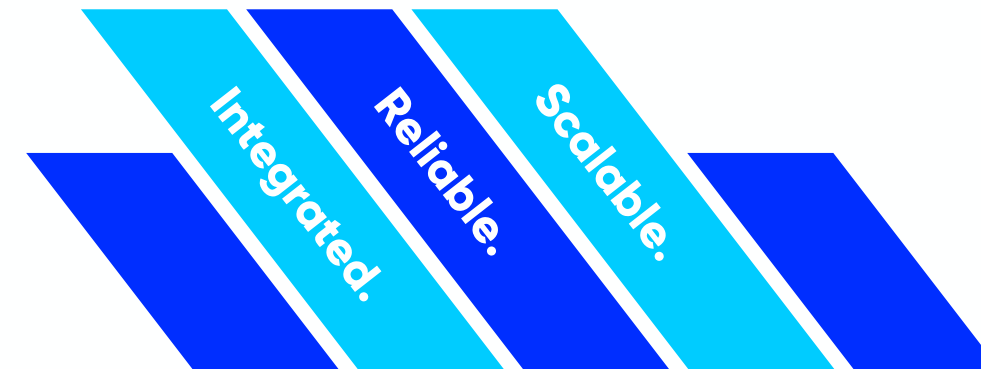

ALL LOGISTICS COMPONENTS WITHIN A SINGLE ORGANISM

Through the interconnection of all assets in port operation –
from terminal employees to truck and train drivers...

...for integrating
value-adding solutions such as

- hazardous goods storage (battery storage) within an electromobility framework
- Production logistics for automotive
- Fulfilment services through the coordinated interaction of transport and warehouse logistics for outsourcing proposals
- Multimodal transport solutions around the logistics hub of Duisburg
- Terminal- and repository-specific training and further development

WITH RESILIENCE AND FLEXIBILITY

YOUR CHALLENGES

Fragile supply chains
and disruption risks

Price pressure with a
simultaneous high level
of delivery reliability

Non-transparent
supply chains

VUCA & volatile
volumes

IT interface connection
to suppliers/
service providers

Resilient solutions and networks

We offer a comprehensive, global network with adaptive, needs-appropriate modes of transport, services and routes – aligned to operational and geographical targets.

Cost optimisation & collaboration models

We guarantee reliability at fair and competitive prices by means of continual cost optimisation for freight purchases combined with collaboration models with long-term partners.

Full transparency

We enable the best possible control over the entire supply chain because we provide all the relevant assets from a single source, from terminals to trains to trucks.

Flexible resources & qualified employee

We coordinate the interaction of all duisport services from a single source according to needs, and provide basic and ongoing training for commercial personnel on a continual and cross-sector basis. For location-independent options for countering volatility.

Warehouse Management System

We offer a TMS (Transport Management System) and WMS (Warehouse Management System) for product-independent solutions; on request, we can also include an IT team for custom developments.

OUR SOLUTIONS

EVERYTHING FLOWS, INCLUDING ON THE ROAD

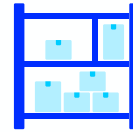

FTL transport

Direct to the destination –
no detours

LTL transport

Partial loads that
save costs and
arrive on time

General cargo

Take advantage
of our hub-and-
spoke network

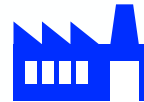

Shunting

Flexible and efficient
onward transport

Container round trips

Optimised container
movements

Company traffic

Implementation of trailers,
containers and swap bodies
within your company site or
terminals

Automotive

Chemicals & hazardous goods

Consumer goods

Trading

E-commerce & pallet logistics

Mechanical & plant engineering

Electromobility

Wholesale & contract logistics

FMCG

MANY YEARS OF EXPERTISE
IN DISTRIBUTION LOGISTICS

WE GET THINGS MOVING
FOR THIS INDUSTRY

AS RELIABLE AND INDIVIDUAL AS EVERY CHROMOSOME

E-trucks for sustainable transports

Reduced CO₂ emissions and environmentally friendly supply chains

Semitrailers

Universal use for a huge range of transport requirements

Multi-chassis, rigid trucks & tractor units

Can be flexibly combined for container and special transports

Box trucks with trailers

Secure transport of sensitive or valuable goods

Sprinters as well as 7.5-, 12- and 18-tonne vehicles

Optimal for local transport and time-critical shipments

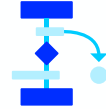

CLEVERLY COMBINED – FOR CAPACITY AND TRANSPORT MODES

Far-reaching **transport networks** from and to the western/northern as well as southern ports or via the Silk Road from/to China

Collaboration with all active service providers along the route

Organisation of pre-carriage and onward transports (via train and truck)

Proprietary plants in locations including Turkey, China and Italy

Use of a range of container types, including options for tracking and security solutions

Packing logistics/ export packing and much more

High level of resilience against capacity bottlenecks, supply chain/transport disruption

Adaptive solutions based on priority:

Lower costs
Greater speed
Specific routes

Individual product modules possible (e.g. FOR-door)

100 years

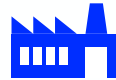

of expertise in multimodal (container) transport solutions

RAIL, WATER, ROAD – OFFERING
FLEXIBLE COMBINATIONS

OUR BLUEPRINT FOR VITAL CONTRACT LOGISTICS

**Warehousing, order picking,
distribution**

**Production supply
(e.g. JIS)**

Container stowage

Value-added services

**Hazardous goods &
battery logistics**

Fulfilment service providers

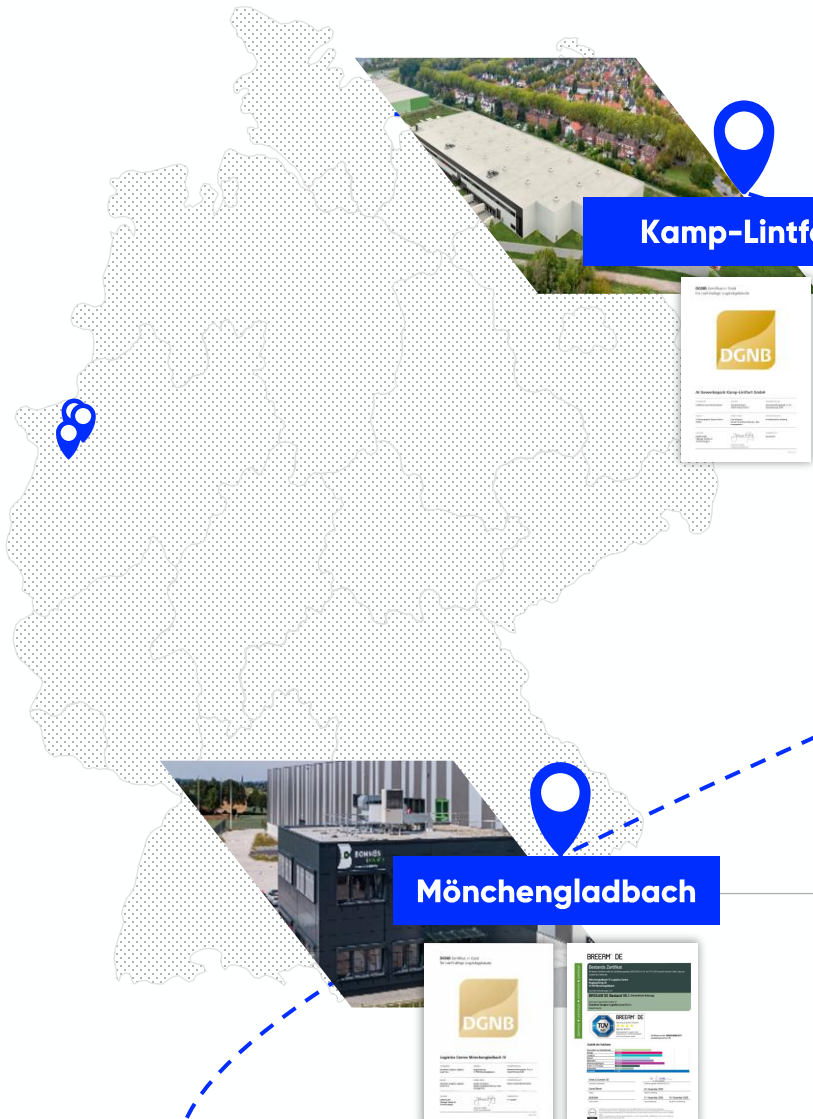

We are your optimised outsourcing partner with long-term options, for lasting reliable and quality-conscious handling

A regional expert for container congestion

Among other services, our offering includes heavy cargo and long goods for train and ocean transport, including upstream and downstream support in the context of customs clearance

THE MAP OF OUR SOUND INVESTMENTS

Kamp-Lintfort

- Plot area: **43,291 m²**
- Warehouse: **18,797 m²**
- Mezzanine: **1,311 m²**
- **35,000** pallet storage spaces
- Storage height: up to 12.20 metres (lower edge of beams)
- **32 dock levellers** + 2 jumbo docks + 3 level-access gates

- **Hazardous goods logistics** (automotive batteries)
- Storage and distribution of FMCG
- E-Commerce fulfilment

Rheinhausen

- Plot area: More than **70,000 m²**
- Warehouse: over **30,000 m²**, divided into **3 halls**
- Handling options: shelf and block storage
- Storage up to 11,50 metres tall (lower edge of girders)
- **20 dock levellers** + 9 level-access gates
- Roofed railway siding of over 300 metres
- Large cross-docking area, separated as needed
- Connection to an international transport network with regular departures

- Handling of steel products, consolidated cargo, automotive and long-life goods

Mönchengladbach

- Warehouse space: **11,800 m²**
- **11,000** Euro pallet storage spaces (gross), of which 9,400 are utility spaces
- Storage height: up to 12,00 metres (lower edge of beams)
- **10 dock levellers** + 1 jumbo dock + 1 level-access gate

- **Storage and order picking** (multi-order pick)
- Complete e-commerce fulfilment with rapid and direct integration of online shops
- Multi-channel distribution centre

Complete solutions for container stowage

IF IT DOESN'T FIT, IT CAN BE MADE TO FIT!

Container stuffing

Container stripping

Storage, order picking
& distribution

Export packing with
proprietary production

Heavy cargo and long
goods possible

2,000 m²
warehouse for
stackable
material

10,000 m²
field warehouse

16
forklifts
3 to 37 t

1 x 40 t
crane

1
container stacker

2 x 32 t
cranes

**Special
equipment**
such as trusses
and hooks

OUR SERVICES

WAREHOUSE SPACE

EQUIPMENT

COMBINED TRANSPORT FROM DUISBURG

Inland shipping

- 20,000 ships annually via Duisburg
- Cost-effective and climate-neutral Westhafen connection
- Water taxi between the terminals

Train

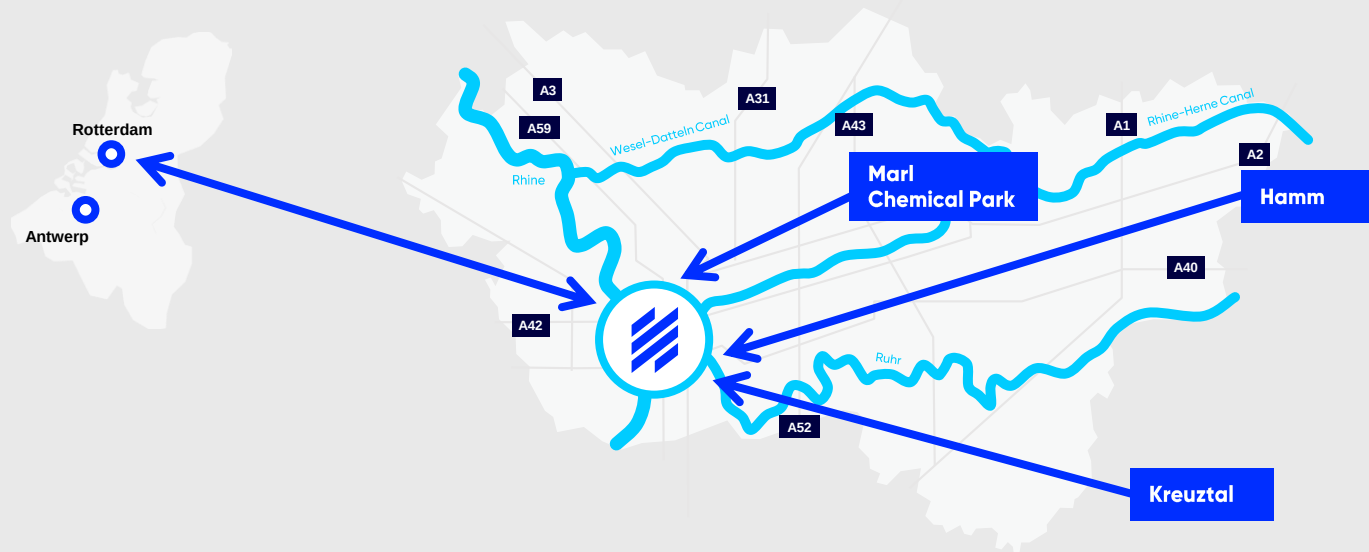

- 25,000 trains annually via Duisburg
- More than 400 rail connections to over 100 direct destinations in Europe and Asia

Truck

- A proprietary fleet comprising around 60 vehicles
- A hub-and-spoke network in Germany with long-term collaborative partners

REGIONAL NETWORK

**Daily connection
between Rotterdam and
Duisburg**

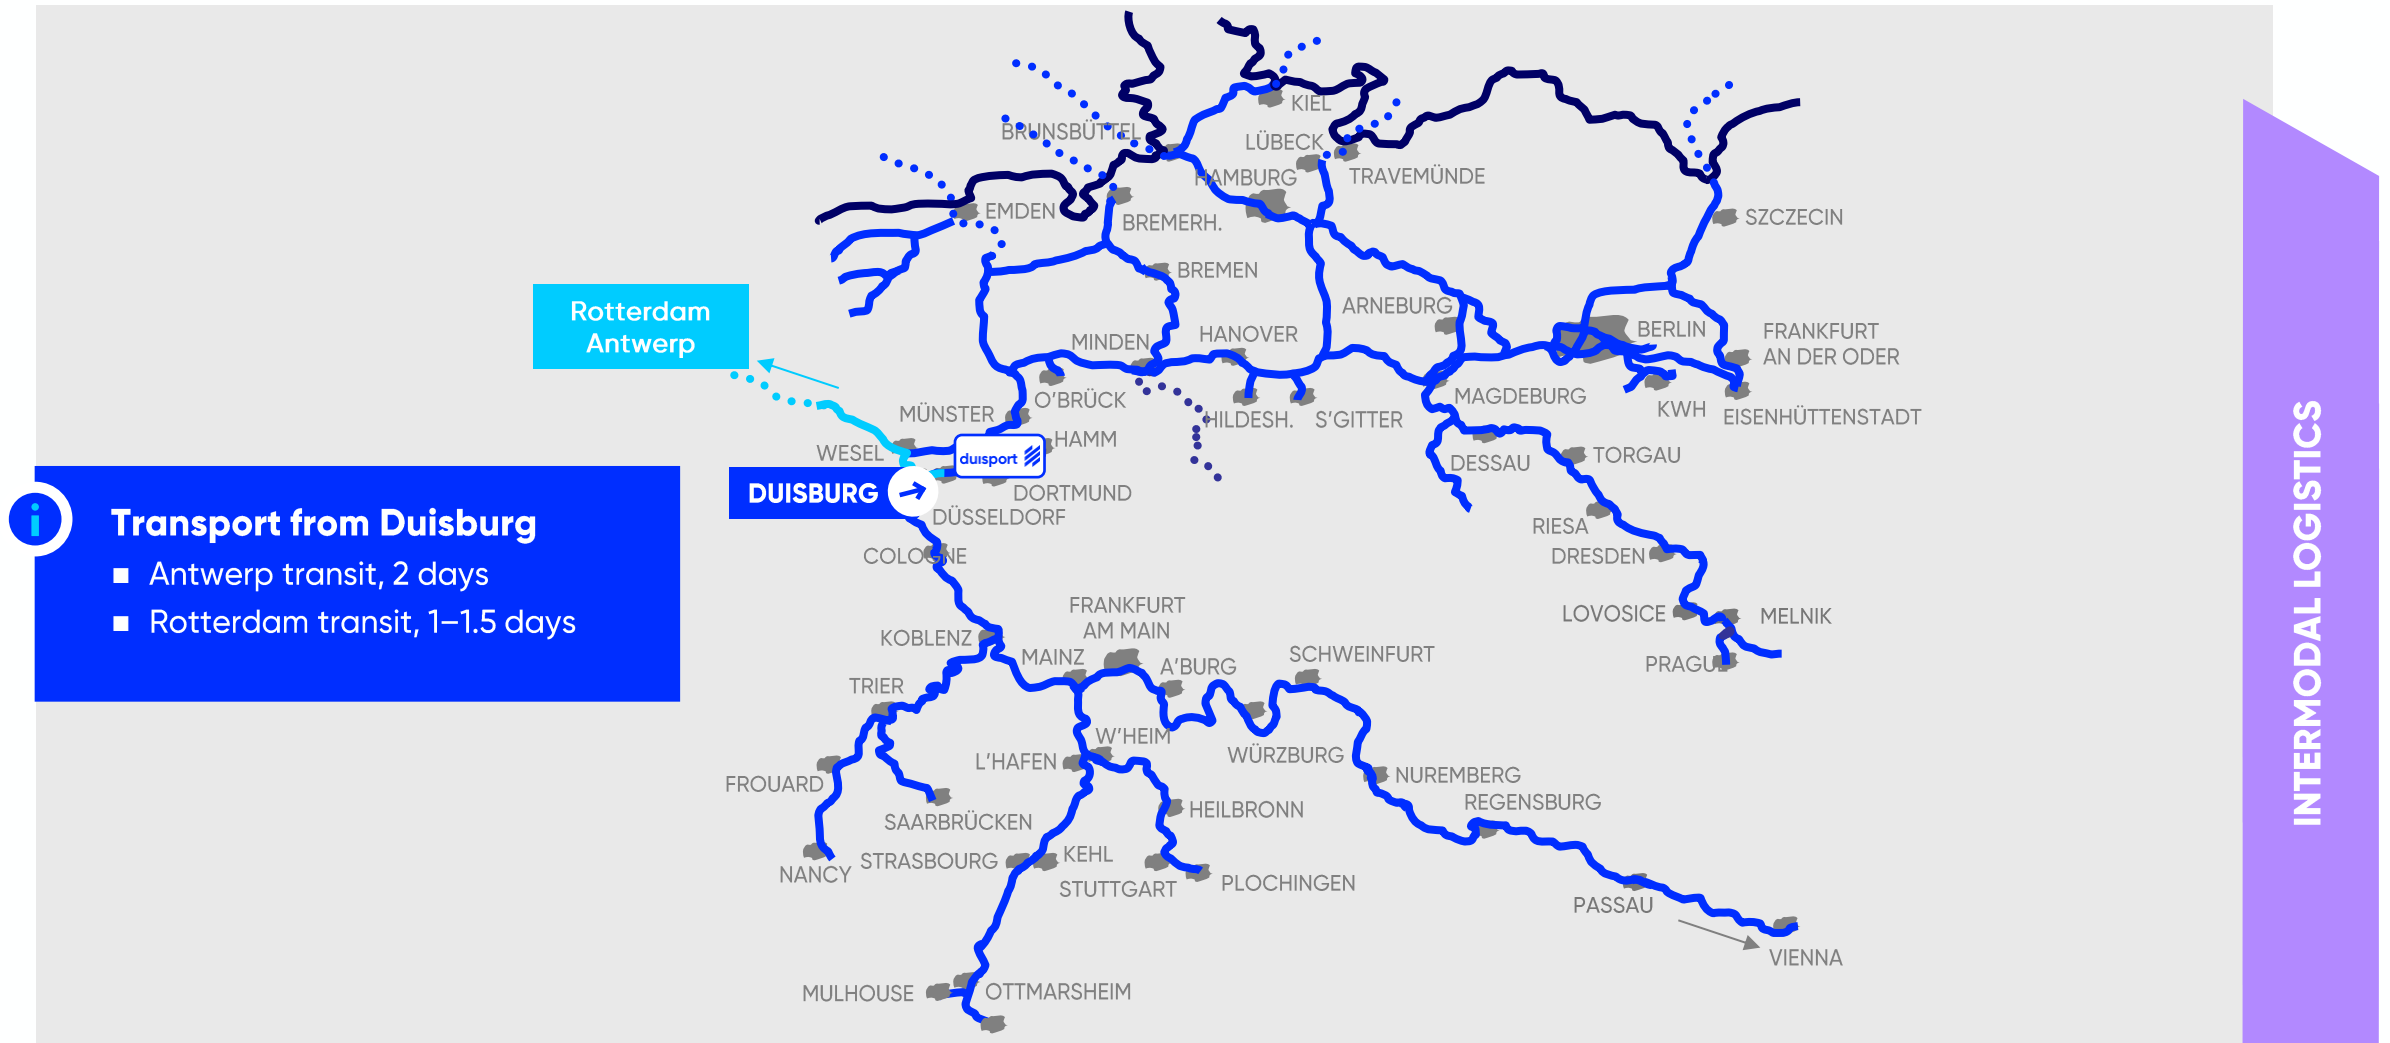

Regular train connection

**As a gateway to the Rhine-Ruhr
region, we connect western
ports with the central hinterland
of North-Rhine Westphalia by
train, thereby avoiding
150,000 truck transports.**

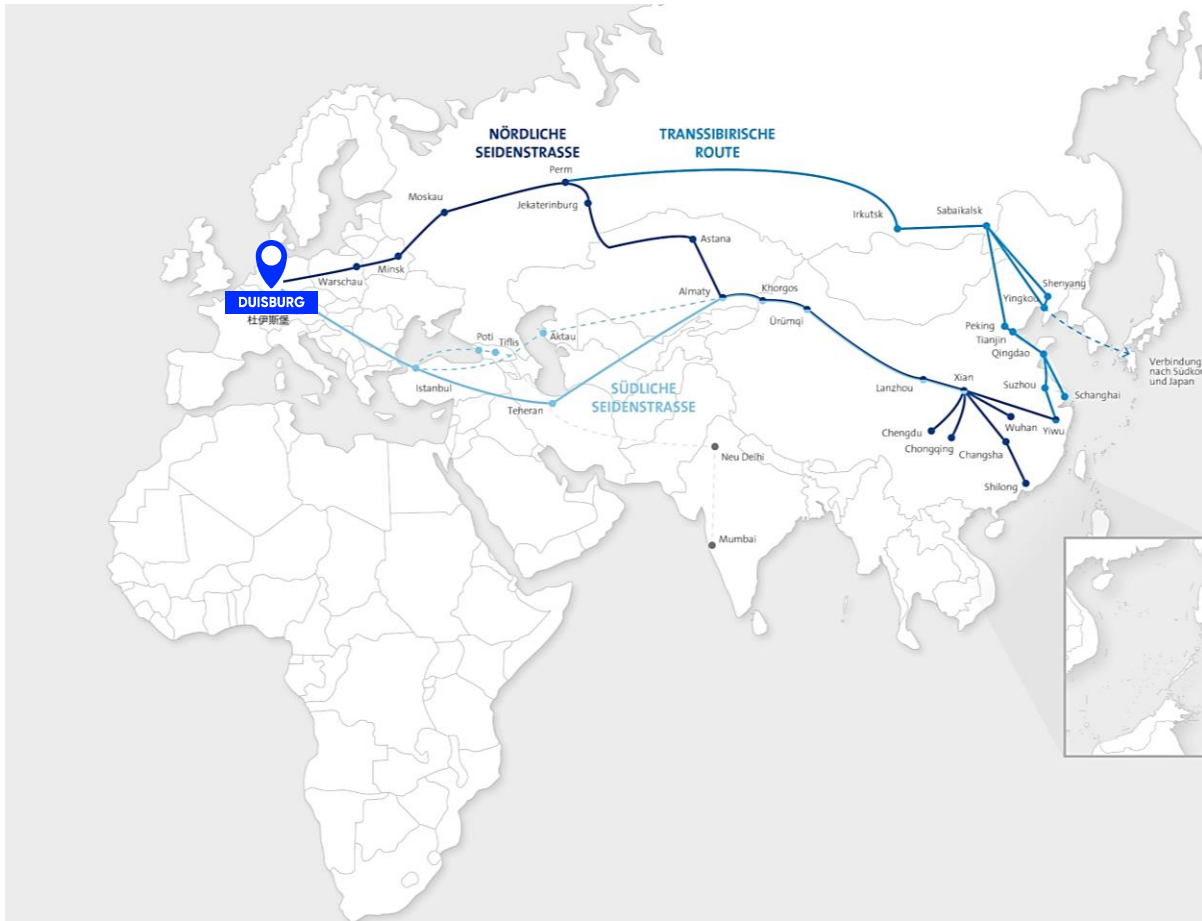

INLAND WATERWAYS WESTHAFEN CONNECTIONS

SHORT SEA FROM DUISBURG

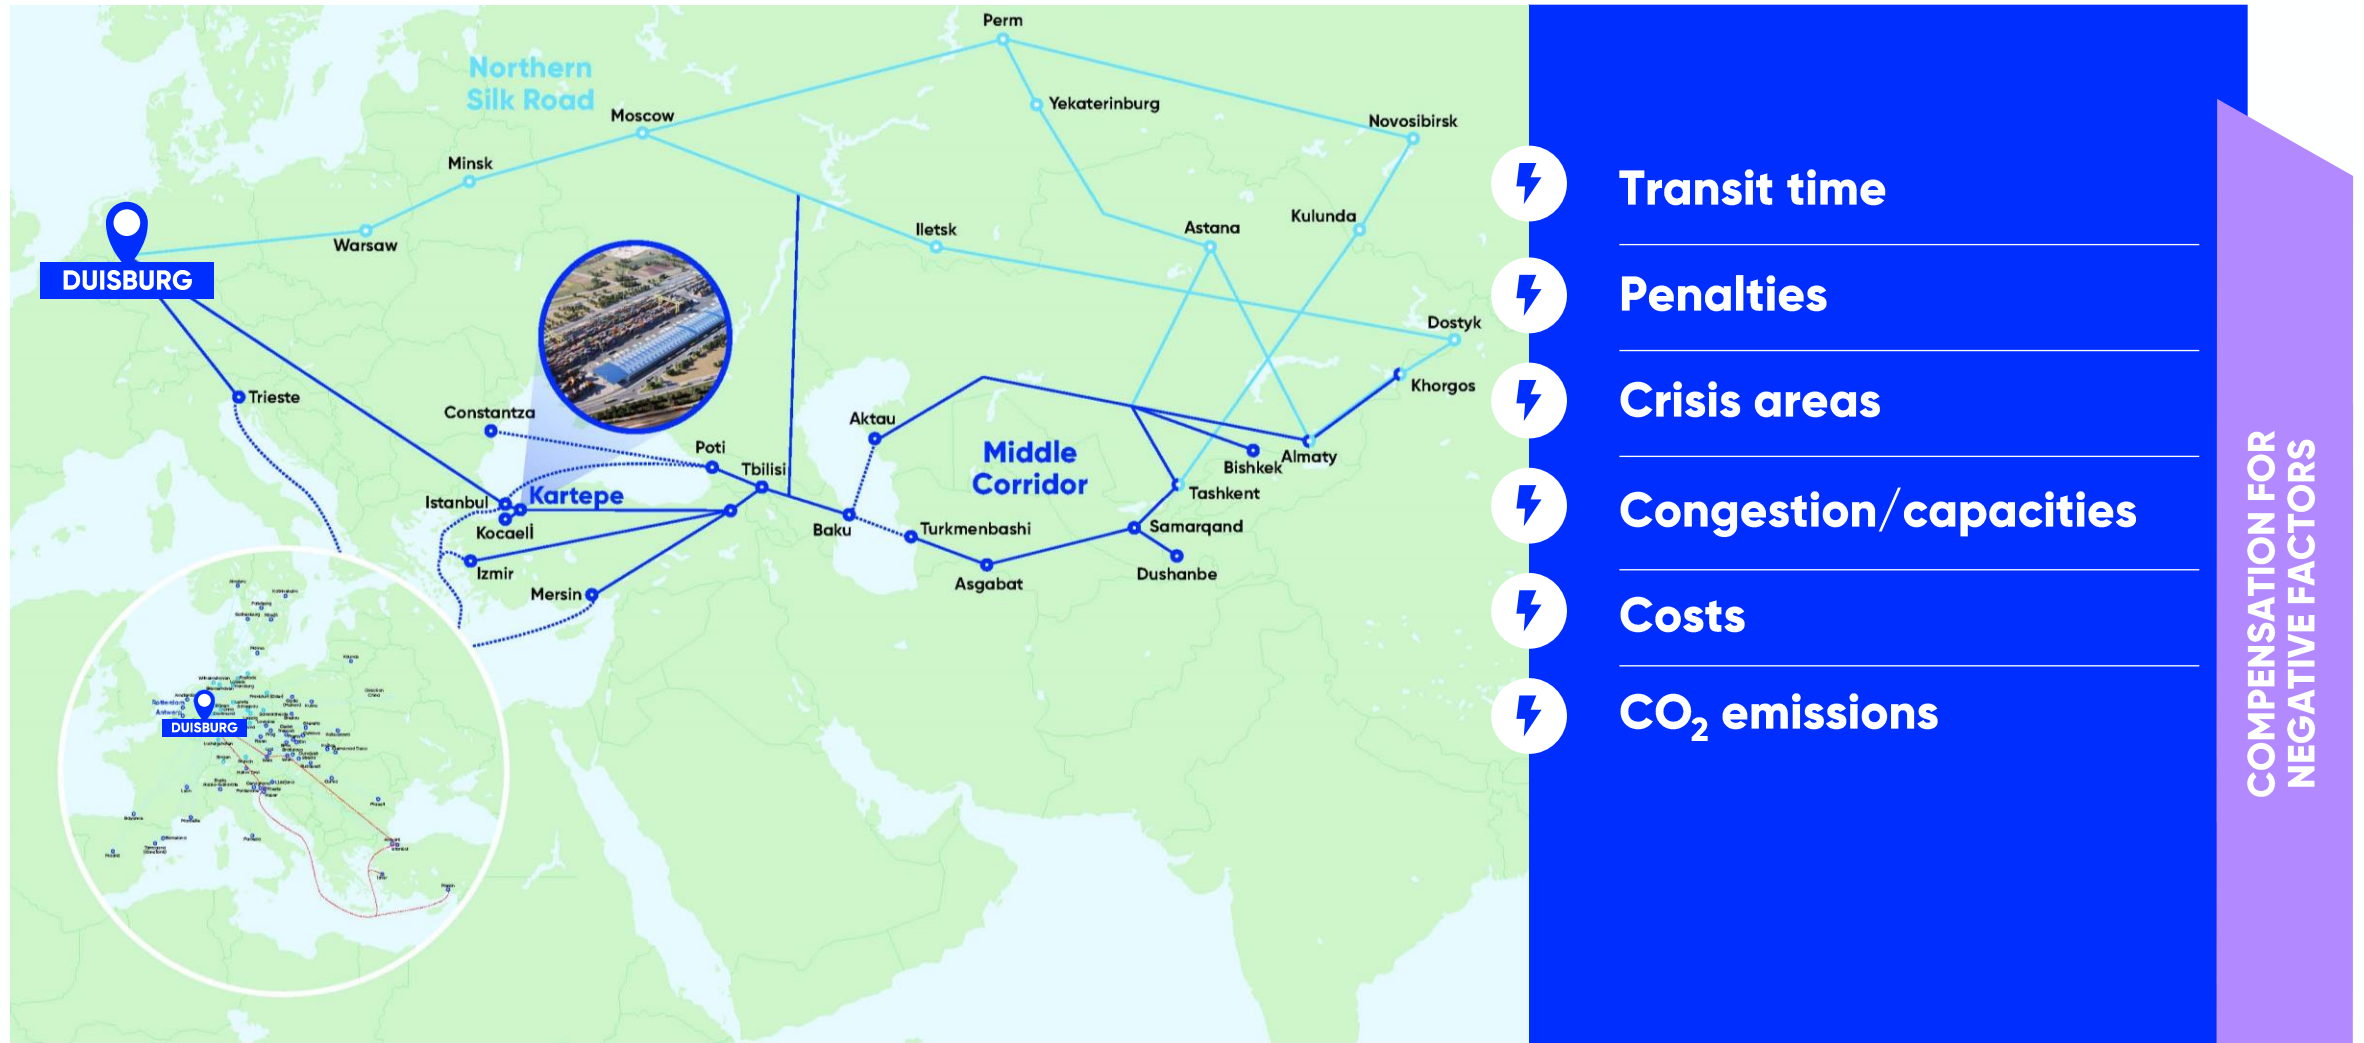

TRAIN CONNECTIONS TO CHINA FROM DUISBURG

- More cost-effective than air freight**
- Door-to-door service**
- Faster than sea freight**
- High level of flexibility**
- Daily shipment tracking**
- Environmentally friendly/reduced emissions**

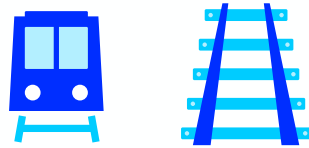

CIRCUMNAVIGATE RISKS AND HURDLES WITH FLEXIBLE ROUTE DESIGN

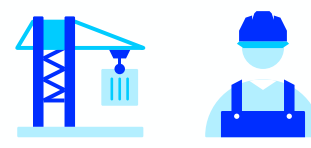

ALONG THOUSANDS OF KILOMETRES OF SUPPLY CHAIN. ZERO DISTANCE. 100 PER CENT CONTROL.

**Because duisport
is there wherever
you need us
– for example:**

by duisport rail
via (duisport)
tracks...

...via duisport
terminal with
duisport crane
operators

...on duisport
trucks with duisport
truck drivers

CONNECTED WITH ONE ANOTHER IN ANY SITUATION

Our solution for #flutwein
(flood-affected wine)

STARTING SITUATION

July 2021

A flood catastrophe in the Ahrtal destroyed almost the entire year's production of regional winemakers and pushed the people to the brink

#schlimmster-jahrgang (worst year)

The 175,000 surviving bottles needed to be sent to donors

Transport of bottles by road

Storage at the Port of Duisburg

Order picking, packing and shipment

Over 60 duisport employees volunteered over the weekend

SOLUTION

More about
digitization
and innovation
at duisport

INTELLIGENT LOGISTICS

in the double helix of structured data

duisport's digital model integrates advanced digital solutions into port and logistics processes

From artificial intelligence (AI) to real-time data monitoring to augmented reality (AR).

Architecture & expertise

Digitalization of business processes

Data & analyses

Digital business models

Example projects

- **startport:** the innovation platform for logistics solutions connects start-ups with logistics companies.
- **RPIS:** RiverPorts Planning and Information System for digitalizing inland shipping.
- **TrailerPort:** the project supported by the Federal Ministry of Transport develops innovative solutions for efficient process integration of trailers in inland ports.

dlps delivers clear added value for process efficiency and sustainability

Digital solutions such as app-based goods inspection, 3D planning of construction and partially automated production result in minimised waste, reduced costs and other benefits.

Example actions

ERP integration

Integrating customer data into our WMS/ERP/TMS system for further processing in logistical processes makes us highly efficient.

AI assistant Drive KIT

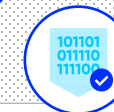

AI-supported efficiency enhancement in vehicle operation, in collaboration with Fraunhofer IML on the basis of duisport-specific data.

RAP/EDI strategy:

Standardised interfaces with customers and service providers, process automation, particularly strong in the O3 WMS area.

open logistics foundation

NIS-2 compliance

duisport digital

dlps digital

RESPONSIBILITY WITH DIVERSITY

Sustainability as a driver of growth and competitiveness

Environmental

Multiplier and pioneer of the green transformation.

Example actions in shore-to-ship power:
69 charging points for shore-to-ship power throughout the entire port region contribute to reducing noise and pollutants locally

Social

Highly skilled and diverse teams drive innovation and ensure we are fit for the future.

Example Diversity Charter actions:
Commitment to recognising, valuing and integrating diversity into the world of work.

Governance

Values-based governance for sustainable decisions and long-term trust.

Example action in the development of culture and values:
Definition of 8 core values as part of the group-wide culture and strategy project.

More about sustainability at duisport

Sustainable duisport

Our site and logistics concepts make a material contribution to all dimensions of sustainability – ecological sustainability, from procurement and production to transport and distribution, to disposal.

Example actions

LNG and e-mobility projects

ESG reporting in accordance with VSME and sustainability certificates

Environmental standards at all sites (EMAS certification)

Shop floor meetings to promote transparent communication and continual process improvement in storage

Several e-trucks in use

- 500 km of range
- 1.5 hours to charge from 20 to 80 per cent
- 600 kWh battery

100% green electricity use at the sites

Sustainable dlps

OUR ACTIONS ARE GUIDED BY OUR VALUES

Deeply rooted in our DNA

Employee-centered approach

We support and challenge one another

Sustainability

We take responsibility

Innovation

We shape the future

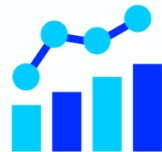

Diversity

We stand for fairness and diversity

Courage & responsibility

We move forward with courage and determination

Performance orientation

We achieve great things

Commitment

We are your reliable partner

Team spirit

We are an unbeatable team

REPLICATING SUCCESS TOGETHER
